

To our patients:

Dr. Kolsi is teaming up with **Kids Doctors on Call (Kids DOC)**, a solely pediatric based telemedicine company that connects patients to a pediatrician via a live video call.

Kids DOC will allow you to video chat with Dr. Kolsi after hours, on weekends, or in instances where a traditional visit to the office is not feasible. Our vision is to provide a telemedicine service with the doctor who knows your child best, thereby eliminating unnecessary trips to urgent care and ER facilities. We know piece of mind in a timely manner is invaluable and that is why we believe live video conferencing is a needed complement to the future of pediatric care.

Kids DOC will be useful for many areas of pediatric medicine, including, but not limited to:

Visual Diagnoses

Pink eye
Rashes
Cuts
Trauma

Counseling

Sleep Training
Breast Feeding
Behavior/Potty training
Discipline
Nutrition

Acute Diagnoses

Fever
Vomiting/Diarrhea
Constipation
Croup
Cough/congestion

Assuming that the telemedicine chat is successful in identifying the diagnosis and establishing an appropriate treatment plan, the visit will be billed to your insurance carrier in placement of the office or ER visit.

To get started, simply sign-up your child.

- On your computer or other mobile devices sign up at www.callkidsdoc.com.
- On your iPhone/iPad search **Kids Doctors on Call** and download from the app store.

Use Practice Code: KolsiMD

Please note that Dr. Kolsi will continue to be available for regular phone calls during office hours, on weekends, and via email as well.
